Fact Sheet on Dental Implants

Dental Implants:

- Are the most advanced tooth replacement system ever devised.
- Helps preserve the jawbone to prevent premature aging.
- Looks and functions like natural teeth.
- Are placed/restored in the doctor’s office using local anesthesia.
- Improves comfort, appearance, speech and confidence.
- Have a 95% success rate.
- Allows patients to eat the foods they love, talk, smile and laugh with confidence.
- Represents a conservative treatment option – adjacent teeth are unaffected.
- Never develops decay.
- Can provide amazing stability for a lower or upper denture.
- Can help people of any age who are missing one or many teeth.
- Gives patients a third set of teeth that are esthetic and function as good or better than natural teeth.

Ask yourself the following questions:

- Are you missing one or more of your natural teeth?
- Do you have a complete or partial denture that is no longer completely comfortable?
- Have you ever been embarrassed by a denture, bridge, or missing tooth?

If you answered “yes” to one or more of these questions, please call us today at 871-2852 to schedule an evaluation appointment. We would be happy to evaluate your present oral health and discuss treatment options that will enhance your dental health.
